

Definition of Done

A story is done when:

- All artifacts are produced and checked in GitLab / Shared in Google Drive
- Appropriate tests have been written for all code that is committed to the central production repository
- All tests are passing
- Statement Coverage is at least 75%
- Artifacts are reviewed by at least 2 other people
- Code is commented and documented (docstrings for classes, methods and member variables)
- Code is written in a consistent style and descriptive variable names are used
- Documentation of how to use and run the software is produced
- Client has acknowledged the story

Strict test and documentation policies don't apply to prototypes & PoCs.

A Sprint is done when:

- Created features are demonstrated in Sprint Review
- Client has acknowledged all stories
- Product backlog is updated
